

B2B Sales Kit

Bandevis Proctor

Transparent employee screen monitoring for BPO, support teams, travel operations, remote staff, vendor teams, and proctoring workflows.

Visible capture

Consent records

Work-hour rules

Reports and alerts

One-minute buyer pitch

Bandevis Proctor helps companies confirm approved work activity through visible, consent-based screen capture. Managers get screenshots, employee status, alerts, daily reports, audit logs, and retention controls while employees receive notice and a clear monitoring workflow.

Best-fit buyers

BPO and support teams

Review approved work activity, offline gaps, and daily screenshots.

Travel operations

Support sales desks, supplier follow-up, document teams, and CRM discipline.

Remote staff

Give managers a practical picture of active work without hidden tracking.

Proctoring workflows

Use visible capture for approved task or exam review where policy is clear.

Demo plan

A clean demo call agenda

Time	Step	What to show
5 min	Buyer requirement	Team size, departments, work hours, monitoring reason.
10 min	Live dashboard	Screenshots, employee status, alerts, reports, audit logs.
10 min	Employee flow	Invite link, consent screen, visible capture, stop controls.
10 min	Policy setup	Retention days, screenshot interval, work-hour rules, access control.
10 min	Commercial fit	Starter, Business, Enterprise, VPS, setup, support level.

Recommended 7-day pilot

Day 1	Confirm team, use case, policy wording, interval, retention, and admin users.
Day 2	Create test employees and verify browser capture, consent, and screenshots.
Day 3	Install visible Windows agent for pilot machines if needed.
Day 4	Review reports, alerts, audit logs, and CSV exports.
Day 5	Adjust work hours, retention, and reporting expectations.
Day 6	Train managers and define the review process.
Day 7	Prepare final quote, rollout plan, and production checklist.

Pricing and rollout

Commercial conversation guide

Plan	Best for	What to include
Starter	Small pilot	Browser capture, dashboard, CSV exports, consent records, standard retention.
Business	Operations teams	Windows visible agent, alerts, daily reports, work-hour controls, audit exports.
Enterprise	Managed rollout	Custom retention, policy rollout, integrations, private VPS discussion.

Buyer objections and answers

Is this legal?

Use employee notice, consent, written policy, work-hour rules, and local legal review.

Is storage heavy?

Storage depends on interval, team size, and retention. Start with 30 seconds or longer.

Can employees know?

Yes. Sell it as visible monitoring with consent records, not secret tracking.

Can we start small?

Yes. Run a 7-day pilot before paid rollout and expand after approval.

Compliance checklist

What buyers should prepare before launch

OK	Employee written notice before invite or installation.
OK	Consent acceptance recorded before active monitoring.
OK	Visible browser capture or visible Windows agent only.
OK	Approved work hours configured before production.
OK	Screenshot interval and retention days agreed in writing.
OK	Admin access limited to authorized managers.
OK	HR/legal review completed for workplace policy.
OK	Process defined for alerts, exports, and employee questions.
